

# Clearly Agile Services

## Lifecycle Assessments //

Our assessment framework encompasses people, processes, and tools across an enterprise which provides a comprehensive view into its lifecycles (ideation to realization). Attaining an independent assessment provides a valuable opportunity to identify organizational waste, risks, and opportunities for improvement.

## Agile / DevOps Transformations //

We have defined, yet tailorable approaches, to best suit the short-term and mid-term needs of your organization. After a quick yet rigorous assessment, we will collaborate with leadership and key stakeholders to develop a transformation roadmap, execute upon it, and then continually measure progress so your organization can gain insight on their next area of improvement.

We have successfully contributed to improvements in highly regulated organizations such as those in insurance, defense, health, telecommunication, energy, banking, and transportation. With nearly 70% of initial Agile transformations failing, you cannot afford to go elsewhere.

## Coaching //

We offer customized coaching and mentoring opportunities from experienced experts across all facets of an organizations Software Delivery Life Cycle.

### Typical Coaching Opportunities Include:

Team	<ul style="list-style-type: none"><li>• Responsible to help teams embrace an Agile-Lean mindset</li><li>• Help teams and individuals with training and mentoring to become highly efficient</li><li>• Go-to expert on Agile, Lean, and team frameworks (Scrum, Kanban, XP, etc.)</li><li>• Highly experienced with Agile, Lean, and team frameworks</li></ul>
Enterprise	<ul style="list-style-type: none"><li>• Responsible to create change agents, across the organization, to adopt a culture that naturally embraces the Agile-Lean mindset</li><li>• Helps leadership, at all levels, to lead transformation efforts</li><li>• Go-to expert on Agile, Lean, scaling, and traditional approaches</li><li>• Highly experienced with Agile, Lean, and scaling frameworks</li></ul>
DevOps	<ul style="list-style-type: none"><li>• Responsible to create change agents to adopt culture, tools, and processes so the organization can deliver high-quality value more often</li><li>• Helps teams implement a disciplined approach for continuous delivery</li><li>• Go-to expert on DevOps methods &amp; challenges</li><li>• Highly experienced with Agile, Lean, and DevOps</li></ul>
Engineering Craftsmanship	<ul style="list-style-type: none"><li>• Responsible to create teams that can develop a true Agile codebase so they can frequently deliver high-quality value</li><li>• Help teams and individuals implement engineer approaches to create easily extendable, maintainable, and testable codebases.</li><li>• Go-to experts of Agile-Lean software approaches, practices, and techniques</li><li>• Highly experienced with Agile, Lean, SOLID principles, eXtreme Programming, and Agile coding &amp; design patterns</li></ul>
